healthcare sustainability and climate justice, which focuses on decreasing the outsized effects of
more comprehensively, adding content in small groups throughout F1. In addition to teaching
Health and the Individual. Over the next year, they plan to weave the environmental threads even
students' motivation to develop the knowledge and skills needed to engage with climate health
"We are rooting our objectives and content in educational theories that will support and foster
paradigm, creating a novel, longitudinal, comprehensive climate change and sustainability
curriculum "infused" into the core preclinical UCSF School of Medicine education. This curriculum
highlight links between human health, climate change, and healthcare system sustainability, and
future.

Meet the UCSF Climate Health Newsletter Team!

Welcome to the UCSF Climate Health Newsletter Team! Our goal is to bring you the latest news,
insights, and updates on climate health initiatives at the University of California, San Francisco.

This month's issue features articles on the impacts of climate change on healthcare, the role of
mental health in climate change, and the importance of community engagement in addressing
climate crisis. We hope you enjoy reading and learning about these important topics.

Stay tuned for future issues of the UCSF Climate Health Newsletter.

Events

The California Air Resources Board will hold a public hearing on a proposal to regulate greenhouse
gas emissions from mobile and stationary sources. The hearing will be held on
January 27-28, 2022. For more information, please visit the CARB website.
