Current health professional students require training that prepares them for the challenges they will face when treating patients affected by climate change. The program, led by Andrea MacNeill, MD and Cassandra Thiel, PhD, aims to foster student engagement in advocacy for the impacts of climate change...

This mini-symposium follows last September's joint UCSF-Stanford sponsored symposium, and it will include case studies, strategies to improve climate change communication with patients and community members.

The impacts of climate change on human health are profound and urgent. Climate change is anticipated to unleash unprecedented threats to global food security and migration.

Climate change is anticipated to unleash unprecedented threats to global food security and migration. This session will evaluate the role of climate change in accelerating the largest wave of human migration in history.

In less than two years, CHN has engaged in over 50 events, meetings with policymakers regarding the severe and life-threatening health harms of climate change. In less than two years, CHN has engaged in over 50 events, meetings with policymakers regarding the severe and life-threatening health harms of climate change.

There has never been a more critical time for advancing health, equity, and social justice reforms in medical schools. This initiative supports student-driven initiatives to promote climate and racial justice.

Auris, and its relationship to dinosaurs, evolution, and climate change. Selected Speakers:
