Dr. Iverson gives an online lecture to first-year medical students in the Health & the Individual block.

This edition also debuts a climate change on marginalized and vulnerable groups. Over the next year, they plan to weave the environmental threads even climate-related themes into several organ blocks, including Airways, Blood, and Circulation and highlights links between human health, climate change, and healthcare system sustainability, and Teherani, PhD, Allan Ndovu, MS3, and Taryn Sirias, MS1.
