climate change on marginalized and vulnerable groups.

Health and the Individual. Over the next year, they plan to weave the environmental threads even further into the curriculum.

"We are rooting our objectives and content in educational theories that will support and foster a climate change paradigm, creating a novel, longitudinal, comprehensive climate change and sustainability education program that emphasizes both the scientific and ethical dimensions of climate-related issues.

Teherani, PhD, Allan Ndovu, MS3, and Taryn Sirias, MS1 have been leaders in shifting that paradigm, creating an elective on sustainability and oral health, and hosting lunchtime lectures on the topic of climate change and oral health.

Among her many activities promoting climate health efforts, Sarah has recently received a Carbon footprint reduction fellowship award, which describes books for children on climate change, and is a founding Advocacy Co-Chair for Climate Health Now, an organization mobilizing the trusted community of medical students who recognize climate change as an urgent threat to health and equity.

Karly Hampshire, a fourth-year UCSF medical student, recommends a new podcast, Code Green: The Climate-Smart Health Professional Guide to Climate and Health Curriculum, created by medical students Natasha Sood and Sarah Hsu! She also encourages everyone to attend the next session, led by Andrea MacNeill, MD and UCSF's Katherine Gundling and Chelsea Landolin will present "Climate Change and Human Health: Creating a Systemic Approach to Addressing the Impacts of Climate Change on Health and Equity." This series includes webinars on various topics related to climate change and health, including case-based learning and strategies to improve climate literacy in the medical school curriculum.

Speaker Coming Soon

The Pschological Impacts of Climate Change: Creating Climate Aware Therapists. There is a significant gap in available mental health providers to work with people with climate-related mental health issues. The Climate Psychiatry Alliance presents this event to address how mental health professionals can help communities prepare for the impacts of climate change and reduce the burden of climate-related mental illness.

February 17 - April 7 Climate Change and Human Health Webinar Series

Over the next year, the group plans to further integrate climate change and sustainability topics into their curriculum, including the development of a new course on climate change and public health. They will also continue to engage with colleagues across the country and evaluate the impact of their efforts on student learning and understanding of climate-related issues.

April 15 | 2:30-4pm Student Corner, with significant contributions from Karly Hampshire and Sarah Schear.

March 18 | 2:30-4pm PST Register here to receive our future emails.
