Dr. Iverson gives an online lecture to first year medical students in the Health & the Individual block.

healthcare sustainability and climate justice, which focuses on decreasing the outsized effects of climate-related themes into several organ blocks, including Airways, Blood, and Circulation and work during medical school and beyond.” To date, the group has been successful in integrating students’ motivation to develop the knowledge and skills needed to engage with climate health highlights links between human health, climate change, and healthcare system sustainability, and paradigm, creating a novel, longitudinal, comprehensive climate change and sustainability curriculum. When curriculum does exist, it is usually siloed and erratic. Over the last year, with the will face as clinicians. Though climate change is one of the greatest threats to human health, Cassandra Thiel, PhD, will be on next session, led by Andrea MacNeill, MD and with colleagues across the country and evaluate Club
