Healthcare sustainability and climate justice, which focuses on decreasing the outsized effects of Health and the Individual. Over the next year, they plan to weave the environmental threads even further into the curriculum. When curriculum does exist, it is usually siloed and erratic. Over the last year, with the support of School of Medicine leadership, climate change & sustainability education is being introduced into the curriculum. For the first time ever, there is a Climate Health and Equity course at TMC with three librarians teaching the course over the next year. To learn more or sign up to serve on the committee next year, contact [email].

61% of UCSF’s carbon footprint comes from burning gas to provide power and heat for our buildings. Electrify UCSF! Visit the website to learn more or join these efforts, please contact the organizers at [email].

Center. Apply via RAP.

Cancer and Environmental Health RFA. Pilot Project – Spring 2021 RAP Cycle

This free 8-week series will provide evidence-based curriculum on the science of climate change and Human Health. This series will be facilitated by UCSF’s Katherine Gundling and Chelsea Landolin. Register here.
