Hosted by the UCSF Office of Population Health & Health Equity and UCSF Center for Climate, SPRING 2021 SPEAKER SERIES: Climate Change and Health in the 21st Century: How Surgeons Can Learn, Engage and Deliver for their Patients and

UCSF's Katherine Gundling and Chelsea Landolin will present "Climate Impacts on Human Health: From Theory to Practice" on March 18 | 2:30-4pm PST

This event will explore how climate change, a major driver of human health and well-being, is currently impacting the health of individuals and populations around the world. It will focus on the importance of considering the impact of climate change on health when planning and delivering care to our patients, as well as on the ways in which surgeons can engage in climate action, from the operating room to the patient's bedside.

How to Act

We're proud to bring you this newsletter featuring medical student initiatives on sustainability and health-related activities around campus. If you have a story or idea you would like to share with us, please send it to our editor, Jingwen Wang, at jingwen.wang@ucsf.edu.

Auris, and its relationship to dinosaurs, evolution, and climate change.

KayLee Hampshire, a fourth-year UCSF medical student, recommends

Sustainable Future's new podcast, "How to Act: Climate Change with Kate Small". "This podcast is a great resource for anyone interested in learning more about climate change and how they can take action to make a difference in their community and the world. The host, Kate Small, delivers engaging and informative interviews with experts in the field, discussing topics such as renewable energy, sustainable living, and the importance of climate justice. The episodes are well-researched and thought-provoking, making it a valuable tool for anyone looking to deepen their understanding of climate change and its impact on the planet. I highly recommend checking it out!"
