The Leaders in Energy Forum will take place on Thursday, August 26th, from 1:30 – 6:30 pm ET. The Forum will include a career fair with Resilient Virginia, an opportunity for participants to meet recruiters and learn about available jobs in the clean energy sector. Attendees will also have the chance to network with industry leaders and potential employers.

On May 22, a group of over 30 former students, colleagues, and family gathered with Dr. Don Kelso at the Potomac Science Center to celebrate and thank him for his positive impact on their lives. Dr. Kelso is set to retire after 40 years of service at George Mason University, and his contributions to the university and the community have been significant.

Dr. Kelso has been a leader in the field of environmental science and policy, and his work has been recognized as the author/co-author of the U.S. Endangered Species Act, Marine Mammals Protection Act, and other key environmental policies and institutions. He has also been a mentor to many students and colleagues, and his dedication to teaching and research has made a lasting impact on the field.

Kelso at the Potomac Science Center is set to begin in September of 2021. If you'd like to support the pier campaign, you can do so through contributions or by spreading the word about the project among your colleagues and friends.
