Join Dean Fernando Miralles-Wilhelm to recognize and appreciate all College of Science faculty and staff.

Cristiana Stan receives funding for coupled

Weather model development

Cristiana Stan, Associate Professor, received $195,313 from the National Oceanic and Atmospheric

Administration (NOAA) for a project aimed at developing a coupled

ensemble weather prediction system.

The study's aims to refine COVID-19 testing and antibody testing to identify individuals immune or

infected but show no symptoms. It also aims to help frontline workers deal with the stress and anxiety of

performing transformative outdoor

research in forensic science using human donors.

The word is out that Mason's

Laboratory Research and Training

Program’s annual virtual awards and College of Science professor Amira Roess recently appeared on

Inside NOVA to discuss Mason’s COVID-19 research targeting

frontline healthcare workers

Mason unveils its new

Mason Science Community

Why is it critical to take time to nominate and celebrate such good works?

I've significantly expanded the awards this year, not just because this was an unusual year, but also

because I believe meaningful employee recognition is a cornerstone of a healthy, growing

culture of positive recognition so critical to our organization during this time of tremendous and

productive change.

Despite the virtual nature of our workplace, thanks to the annual Dean's Awards to be shared at next

term's first newsletter of 2021, I'll be sharing news of all awards recipients and winner acceptance

speeches within this blog. Of course, I'd have much preferred to connect with you during face to face meetings.

It's been almost 6 months since I've joined Mason's College of Science and it seems crazy to me that I

was excited to review the names of 100-plus nominations for more than 60 candidates for the 9

awards.  Thanks to the Award Nominating Committee for sorting through the submissions as all efforts

are to make this a truly special event.
