Cristiana Stan receives funding for coupled weather model development

The study's aims to refine COVID-19 testing and antibody testing to identify individuals immune or infected but show no symptoms. It also aims to help frontline workers deal with the stress and anxiety of working during the pandemic

Proposals due Friday, December 4

The Office of the Provost is offering grants for Summer Team Impact Projects (STIP) for Summer 2021. These

Participate in community activities

Join Dean Fernando Miralles-Wilhelm to recognize and appreciate all College of Science faculty and staff.

Three multidisciplinary projects will explore a central theme, a research question, or a community identified problem.

During this session, consultants will discuss several potential scenarios for the development of Mason's three primary campuses. This is a key opportunity to have your opinions heard and questions answered.
