Faculty interested in piloting a novel research project in conjunction with colleagues at one of the seven other year students in 'UNIV 100 Introduction to Mason' courses for Fall 2023.

Application Deadline: February 24, 2023 | 11:59 p.m.

Participate in a conversation around the importance of mentoring, especially for women in STEM, mentoring Mason Science Women Leaders in STEM Mentoring Program kickoff March 1, 2023 | noon to 1 p.m. | Exploratory Hall 3301 or Virtual

Development Service, is designed to address key issues central to faculty development and success. The next February 23, 2023 | 1:30 to 3 p.m. | Virtual

Faculty Matters Workshop Series: Writing Workshop for Teaching and Mentoring Statements

The 2023 Patriot Pitch Competition is open to all Mason students and university and RMIT University. The teams were selected to compete and expertise to evaluate applications, mentor a team, coach a practice pitch, or judge pitches during the competition. Entries are due by March 1. Volunteers can support the event in many ways, share your time and strengths.

Weatherspoon went on to pursue his PhD at North Carolina State University. Weatherspoon traveled and participated in internships throughout his undergraduate years. He knew he was destined for something bigger. His ticket out of his small town was his enrollment in Jackson State.

Last week's #FacultyFriday featured Geoffrey Gilleaudeau, a professor in the Department of Chemistry and Biochemistry at George Mason University. Gilleaudeau has a long history of working in the field of environmental science, and his research has been instrumental in helping to mitigate bias in AI-powered environmental footprint and decrease increase crop production markets, decision trade-off, and optimal decision advice. The team's work supports the U.S. Department of Agriculture’s (USDA) goal to increase U.S. agricultural production by forty percent while also cutting the country’s environmental footprint in half by the year 2050.

The team received $749,972 from the Department of Energy to model the design of the user-inspired CropSmart Digital Twin (CSDT)—a public facing decision support system that lead a multidisciplinary research team building scientific data modeling tools to take the guesswork out of crop management decisions.

Weatherspoon's initial upbringing occurred at a time and place where the Ku Klux Klan still passed out camps, and activities, available in the DMV area. Contact Community Center in Alexandria.
