COVID-19 FDA Vaccine Approval - Mile 18

As Dean of the College of Science, one could say I've had a rather unique and predominantly scientific view of the COVID-19 pandemic race. Our Mason researchers and staff have spent countless months developing novel and non-invasive saliva-based antibodies testing; fluid vaccine development in collaboration with four different countries in our BRL3 labs, our researchers have been working on developing safer and more effective vaccine distribution and testing sites for our communities.

The FDA's priority has been to ensure that the new COVID-19 vaccine is widely accessible and safe for all citizens. We at Mason Science have been working with Dr. Anthony Fauci, the nation’s top infectious disease expert, to help improve vaccine distribution and testing.

In partnership with Fairfax City and surrounding businesses, Mason faculty, staff, students, and retirees have access to a number of discounts. These include restaurants, fitness courses, hotels and travel, and more.

Stay up-to-date on Mason athletics alerts, including game schedules and gameday details by downloading the new George Mason Athletics app. To download the app to your Apple or Android device:

1. Go to the Apple App Store or Google Play Store.
2. Search for the "George Mason Athletics" app.
3. Download the app and follow the prompts to get started.
