Shining a Light on the Dark Web

As many of you know, the DHS Centers of Excellence have staggered life cycles dating back to 2002, and the CINA Center will soon enter its fifth year of operation. We are proud of everything we have accomplished in the first four years, but we are even more excited about the years to come. Thank you for supporting CINA’s work in the last four years and for your continued support moving forward.

As you will recall, the DHS Centers of Excellence have emphasized the importance of establishing a broad and dispersed audience than ever before. Thank you to all who supported and attended the 2021 COE Summit, where we presented Accurate and Time Efficient Inference of Fragment-to-File Associations, a leading exercise which examined a supply disruption due to COVID-19.

The DHS Centers of Excellence Summit was held the week of May 17-21, 2021. In a dispersed audience format, the event featured a diverse roster of speakers and sessions, including Secretary Mayorkas, 102 presenters, and 155 posters. Attendees had the opportunity to connect with students, faculty, researchers, practitioners, and partners from government, law enforcement at all levels, academia, and 65 different industry representatives, in addition to expert speakers.

The 2021 COE Summit was loaded with experts and timely information, successfully pushing the limits of what can be done with the HSEEP format with a goal to achieve the summit’s experiential learning objectives:

- Help students understand the perspectives and roles of DHS components, agencies, and the future workforce.
- Teach students real-world skills for critical thinking while addressing a complex homeland security problem.
- Provide an opportunity for a diverse group of students to discuss critical issues and solutions.
- Help students understand the perspectives and priorities of DHS component agencies, and the future workforce.
- Help students understand the perspectives and priorities of DHS component agencies, and the future workforce.
- Help students understand the perspectives and priorities of DHS component agencies, and the future workforce.

Attendees could visit 20 virtual COE booths and 135 posters at the summit, where they could visit and interact with the local experts.

The CINA Science Director, Maj Gen Randy Kee, joined our Center of Excellence Summit to present on the topic of illicit trade, trademark counterfeiting and to-File Associations. Maj Gen Kee moderated a session on illicit trade, trademark counterfeiting and to-File Associations. Maj Gen Kee moderated a session on illicit trade, trademark counterfeiting and to-File Associations.

Attendees could also visit the popular DHS Leadership panel discussion on Emerging Threats and Challenges.

In addition to event pre-production, CINA Science Director, Maj Gen Randy Kee, worked tirelessly for months leading up to the events to coordinate everything we have accomplished in the first four years, but we are even more excited about the years to come. Thank you for supporting CINA’s work in the last four years and for your continued support moving forward.
