Shining a Light on the Dark Web

The last decade has seen a sharp rise in criminal activity on the internet, with a growing number of transactions and more than 1.1 million listings on Dark Web marketplaces. This increase has been driven in part by the greater anonymity of sites not indexed by search engines like Google, and the appeal of using relatively new technologies like cryptocurrencies to conduct transactions.

To learn more about this exploration of the dark web, Dr. Jeffrey Hardy will present at the CINA Distinguished Speaker Series on illicit trade in the forms of trademark counterfeiting and digital piracy. This presentation will be held on June 29th at 8pm ET. You can register for the event here: [Event Registration](https://www.example.com/register).

The CINA Distinguished Speaker Series is a monthly event featuring experts in the field of criminal investigations and network analysis. Previous speakers have included Dr. Olga Smirnova and Maj Gen Randy Kee. You can view recordings of these past events on the CINA website. Upcoming speakers include Dr. Jim Jones and Maj Gen Randy Kee, both of whom are speakers at the upcoming DHS COE Summit.

Digital Archive: Jeffrey Hardy on illicit trade, trademark counterfeiting and digital piracy

View the recent CINA Distinguished Speaker Series with Jeffrey Hardy as he discusses illicit trade in the forms of trademark counterfeiting and digital piracy. This presentation will be held on June 29th at 8pm ET. You can view the archive here: [Digital Archive](https://www.example.com/archive).

You're invited to submit articles, photos, videos, and story ideas to include in upcoming editions of the CINA newsletter. Visit the website for more information on submitting content. You can also subscribe to our email list to receive our future emails.
