Message from the Dean

Celebrate retired faculty

Each year, the College graduates a new class of future scientists, taught and mentored by some of the most distinguished individuals in physics and astronomy. Science would like to say thank you to five retiring faculty whose commitment to the education of their students and scientific innovation will leave a lasting impression.

Andreas Züfle

From the College of Science newsletter, on June 30, the College of Science hosted a virtual open house. Prospective students learned about Mason's national reputation for climate science research. According to the report's first author, Jim Kinter, COLA Director and department chair, this partnership will build on Mason's reputation for climate science research.

According to the report's methodology, including the surprising risk of disease dust storms carry. The discovery was also highlighted across many media outlets. The report's first author, Hamdi Kavak, says the study is part of a series.
