THOUGHTS FROM THE DIRECTOR

Jim Jones

On August 20, 2020, I received a CINA白paper titled "New Value Proposition for Cybersecurity Solutions: A Global Perspective." I was impressed by the thoughtful research and the clear presentation of the findings. I believe this document will be valuable to our members and other stakeholders.

The annual budget for cybersecurity is expected to reach $500 billion by 2025. This is a significant increase from the $144 billion spent in 2019. The rise in spending is due to the growing threat landscape and the increasing complexity of cyber attacks. The CINA whitepaper provides a comprehensive analysis of the trends and challenges in the cybersecurity industry.

I encourage our members to read this whitepaper and to share their insights and feedback. CINA is committed to staying at the forefront of cybersecurity research and to providing valuable resources to our community.

NEW RESEARCH

The Evolution of Human Trafficking During the COVID-19 Pandemic: A Foreign Residences

From outside alliances and larger gangs benefit from keeping ties within; 4) Social networks are crime, members select their own; 3) Gang cohesion matters for survival. Smaller gangs benefit storefronts to covertly process payments for illegal activity.

The talk highlights how criminal organizations circumvent the payments and discuss how credit card transactions have increasingly become a conduit for money laundering. The talk is part of a series on organized crime trends in the digital age.
