On August 4, 2020, we held our CINA Annual Meeting under these "new normal" circumstances - a virtual conference with over 100 attendees from government, industry, and academia, view-ahead video presentations from 15 different research teams complemented with live Q&A sessions for each, an excellent keynote address from William Bryan and updates from the CINA and OUP teams, and a look at the emerging challenge landscape from the CINA Science Committee.

The Annual Meeting reflected on the last 12 months during which we helped plan and execute the second COE Summit, positioned three research projects for transition, launched a running OpenRFP to increase research project agility and timeliness, continued a multi-COE project on cartel smuggling, moved our Distinguished Speaker Series and other events online, produced a white paper assessing the impact of the pandemic on criminal networks and investigations, and supported three MSI Summer Research Teams, all while managing a director transition and the effects of the pandemic.

My two big takeaways from this last year are (1) the only constant in life is (unexpected) change, and (2) a good organization and team sees the opportunities in such a dynamic environment, thinks creatively, and pivots quickly, and not only survives but thrives.
CINA Open RFP 20-21

CINA is seeking white papers presenting research ideas intended to address questions and challenges that CINA, DHS, and/or its federal partners are currently facing, or are expected to be facing in the near future. This is an open, rolling RFP. Submissions will be accepted at any time during the RFP open period (June 2020 – June 2021). Check out our website for more information.

The Evolution of Human Trafficking During the COVID-19 Pandemic | Council on Foreign Relations

Louise Shelley, CINA Science Committee Member, and the Omer L. and Nancy Hirst Endowed Chair at George Mason University Schar School of Policy and Government, and Christina Bain, provide research about human trafficking during a global pandemic.

Beyond 9/11- Homeland Security and Transnational Crime Virtual Panel Discussion
Friday, September 18, 2020, 12:00pm-1:30pm

What does it mean to “secure the homeland” in the twenty-first century? During this event, leading experts will provide strategic lessons and crucial recommendations for the future of homeland security. Register now.

Virtual Event/ Finding Trafficking Networks in Online Commercial Sex Ads
Wednesday, September 16, 2020, 12:00pm-1:30pm

Speaker Crysta Price discusses human trafficking, including a case walkthrough that describes how data analytics, AI, and collaboration with law enforcement agencies led to the dismantling of a large international sex trafficking organization. Register now.

Virtual Event/Transaction Laundering and the Facilitation of Cybercrime Through the Online Payment Ecosystem
Wednesday, October 14, 2020, 12:00pm-1:30pm

Speakers Lilly Richardson and Jenny Mosbacher discuss how credit card transactions have increasingly become a conduit for money laundering. The talk highlights how criminal organizations circumvent the payments and banking ecosystem’s risk and compliance controls by setting up fake online businesses and storefronts to covertly process payments for illegal activity. Register now.
Virtual Event/ Social Outlaws: What Network Data Tells Us About Gangs
Wednesday, November 11, 2020, 12:00pm-1:30pm

Martin Bouchard will present virtually on four lessons learned about gangs and networks, formulated as testable empirical statements: 1) Gang boundaries are messy but best measured via networks; 2) Gang members routinely work and interact with non-members. For high stakes crime, members select their own; 3) Gang cohesion matters for survival. Smaller gangs benefit from outside alliances and larger gangs benefit from keeping ties within; 4) Social networks are the strongest predictors of gang violence. Register today.
