ANP Lighting®

Sequoia Series

Offering boldness and scale with our latest faux wood series.

Inspired by California's majestic Sequoia National Park, ANP Lighting's Sequoia Series is available in a single or twin-arm setup and is a great way to avoid the high costs and maintenance of real wood poles.

Originating as a custom project with the help of Visual Concepts Lighting, ANP is now offering the Sequoia Series as a standard product due to its popularity.

Proprietary to ANP, our Sequoia powder coat finish is skillfully hand streaked with black paint to mimic textured wood. The decorative scroll and black aluminum banding add to the rustic design of the series. The pole and post arms are created with 6” x 6” square steel or aluminum tubing.

Click here to view Sequoia Series on ANPlighting.com

Choose from an extensive line of RLM fixtures to combine with Sequoia Series' arms to find the perfect lighting solution for your project. Fixtures are available with ANP's LED light guide technology or a TIR performance platform engine.
