Concur Messaging - Travel Expense Report Review Status

Have you noticed the "Login Warning" pop-up window when you first login to Concur? Instead of clicking OK to make the message go away, take a moment to read through the updates included in that window. The latest information that we have included, in an effort to raise awareness and manage expectations, is the status of Travel expense reports arriving in the Central Office workflow.

To avoid out-of-pocket expenses and a delay in receiving reimbursements, use one of the university's purchasing/payment channels such as Procurement Card, Travel & Entertainment card, Booking Travel through Concur, Amazon Business and Oracle Procurement. Reference our Procure-to-Pay Decision Matrix, the Travel & Entertainment Card and the Booking Travel web pages for more information.

Enhancement: Project Information Lookup
The following enhancements have been made to the Project Information Lookup Panorama:

- A Report List has been added as the first page of the panorama.
- Prompts for Fund and L4 Financial Unit have been added to the Project COA Lookup report.
- A prompt for Project Owning Organization has been added to the Non-Sponsored Project Task DFFs report.
- The Project Overview Report has been rebuilt in Cognos (linked from the Report List page) and the following fields have been added to the report:
    1. Project Creation Date
    2. Project Class Category and Project Class Code*
    3. Effective Burden Schedule, Effective Burden Schedule Multiplier, and Effective Burden Schedule Level.
        1. If there are Project or Task Burden Schedule overrides in place, the report will display the lowest level Burden Schedule applicable to the Award/Project/Task.
        2. The Effective Burden Schedule Level displays which level (Award/Project/Task) the Effective Burden Schedule comes from. For example, if the Task has a Task Burden Schedule override in place, the Effective Burden Schedule Level column will display 'Task'.
        3. For more information on Burden Schedule overrides, see Understanding Burden Schedules.

Thank you to everyone who submitted these enhancement requests, including: Lindsay Root, Marissa Prough, Ariel Tam, Bryahna Keels, Chay Mendoza, Hanna Choe, Michelle Tellez, & Chester Yao.

*Note: Associating accurate Project Class Categories and Codes will become increasingly important as future report developments will allow you to search for and display information about projects based on their classifications. The Project Overview Report can be used to review how

projects are classified (see chapter 2 of the PPM User Guide) and PADUA can be used to update Project Classifications. We encourage you to start reviewing Project Class Categories and Codes.
