There's something in these hills

There's something in these hills Freshmen have moved into their residence halls and fall classes have commenced! The energy from our students buzzing through Long, Hunter, Martin, Kinard, Jordan and the Life Sciences Facility is electric! As the founding dean, who has officially been part of the Clemson Family for one year and has experienced the start of an academic year as both a student and an educator, I can tell you that there really is something magical in these hills.

I wanted to reach out to our 13,000-plus Science alumni and share with you three important accomplishments of our college in the last year.

First, our Science Forward strategic plan, which was developed with both internal and external stakeholders, is now live. It will be our roadmap as we collectively advance Science Forward.

Second, Science shined at the July Board of Trustees meeting, where Trustees engaged with our faculty, staff, and students. I have received so much enthusiastic feedback on their Science engagement.

Third, if you are thinking about coming to Clemson for the homecoming game on October 20th, we will have our inaugural Science tailgate. I look forward to connecting with you there.

We are focused on building a world-class College of Science at Clemson, and we would like you to be our teammate. As you view our new Science strategic plan (click here) and our video and viewbook (see below), I encourage you to find what you are most passionate about. And I ask you to engage — with your time, talent and treasures — in Science.

Hope to see you on October 20th!

Go Tigers!

Here is our story

As part of the Dean’s presentation to the Board of Trustees in July, a video was created to tell the Science story. Enjoy!

Give to SCIENCE

Trudy Mackay, director of the Center for Human Genetics, explains her research at the official opening of the center. Listening in the front row (from left) are Robert Anholt, Provost’s Distinguished Professor of Genetics and Biochemistry and director of Faculty Excellence Initiatives in the College of Science, President James P. Clements and College of Science Founding Dean Cynthia Y. Young. Image Credit: Clemson University Relations

Clemson Center for Human Genetics opens doors to SC — and the world

The Clemson Center for Human Genetics officially opened for business Aug. 7, ushering in a new era for research into the causes of human disease. The center is dedicated to technology development and gene discovery and is led by a team of world-renowned scientists.

Expect Excellence:

College debuts inaugural viewbook

The College of Science will unveil its first-ever viewbook this fall, offering an inside look at the facilities, programs, and research of the college. The 2018 undergraduate viewbook is available online for students, prospective students, and families who are interested in learning about the College of Science.
