Oracle Financial Cloud

New Chart String Validation Rule

Two new cross validation rules (CVRs) were implemented to ensure that all chartstrings entered into Oracle Cost Transfer are validated.

- New CVR Rule: Project required on chartstring for SP (GL-114889660) [20700.5000051.522201.400.000.000000.0000000]: Cross-Validation Error: The combination account combination that's disabled. You must enter a different account combination.

   Sample Error Message:

   
   Your COA/POET failed Validation due to the following error message:
   
   CoA Failed Validation
   
   You entered an account combination that's disabled. You must enter a different account combination.

   If you try to submit a transaction with one of the funds above, you will receive a COA Validation error.

   During the first 90 minute session of the series, we will explore the new Project segment. This will give you the necessary background for the next Hot Topic meeting.

   Join the new centralized Oracle BI team and see how to leverage the powerful tools in Oracle BI & Financial Reporting Series: Project Dashboard. During the second 90 minute session, we will provide hands-on experience with several Project segment features and then open the floor for questions from attendees.

   Please join us on Thursday, January 28 @ 9:00am.
