New Chart String Validation Rule

Two new cross validation rules (CVRs) were implemented to ensure that all transactions post to PPM accurately and to assist with the PPM to GL cleanup of historical transactions affected by newly implemented CVRs. Please refer to the New Chart String Validation Rule article for more information on how to resolve these errors.

Update on Payables Ledger Discrepancies

The transactions that were impacted involved invoices that had new line items between some Payables charges posting in the General Ledger versus PPM. As reported at the end of last year, there were discrepancies discovered between some Payables charges posting in the General Ledger versus PPM.

How to View Available Form Field Options

When using a chart string (charge account) that is associated with a project, it is necessary to also populate the POET information in the Billing section. Refer to the How to View Available Form Field Options article for instructions on how to ship goods ordered via Trade Street.

Oracle Cost Transfers

Oracle PPM has introduced a couple of features to speed up the transfer process between cost centers.

How to Default a Deliver-to Location in Your Profile

If you were previously using the Trade Street-Preferred address in Oracle Procurement, then you will need to choose a new deliver-to location in your profile. Please refer to the How to Default a Deliver-to Location in Your Profile article for instructions.

How to Ship to a Personal Address

Orders placed for personal addresses are processed through Oracle PPM. However, manual changes to orders shipped to personal addresses will no longer be possible.

How to Request an Oracle PPM Award Temporary Extension

The Transactions tab is now available in the Budget & Finance Portal for sponsored projects. This will allow for easier data entry and access to common project data.

How to Resolve POETAF/COA Failed Validation Errors in Concur

These errors are not related to budget/coa validation. Please refer to the How to Resolve POETAF/COA Failed Validation Errors in Concur article for detailed troubleshooting steps.
