Joining a group helps with accountability, making it a habit, and making it fun! You can walk and 

Jenny Weber

and more frequently.

However, combinations with other active/inert ingredients may have different effects, many of 

benefits of ridding weeds.

Can damage desirable plants too! For example, glyphosate by itself is low in toxicity to humans 

don't have many herbicide-resistant weeds. However, there are weeds that have developed resistance 

to glyphosate. The reasons for resistance vary, but some common reasons include poor 

WeedClear®, WeedBGone®, Weed Stop®, etc.

active ingredients, that have different names and purposes (Fig. 2).

° Trade name

° Common name

- ground Clear®, GroundClear®, Ground Clear®, etc.

The product label on the back of the container lists the active ingredient(s) in the product and 

GroundClear® label showing restrictions to use.

Examples of herbicide 

The active ingredient(s) are also listed on the label, which helps identify the 

way to use the product correctly.

Examples of attractive 

drive the plant to grow and develop.
