In a Ceremony held on September 13th, José M.F. Moura was awarded the title of Doctor Honoris Causa by Universidade de Lisboa, after a proposal by Técnico, where he studied and lectured. The prestigious award was presented to Moura, who currently serves as the Dean of the College of Engineering at Carnegie Mellon University and as the Director of the CMU Portugal Program, by the President of Universidade de Lisboa, António Pacheco. The ceremony was attended by a large audience of students, faculty, and guests who were all present to honor this extraordinary achievement.

José M.F. Moura is a highly respected researcher with a vast array of accomplishments, including being a member of the National Academy of Engineering and the American Academy of Arts and Sciences. He has made significant contributions to the field of engineering, particularly in the areas of control systems and signal processing.

Moura's career has been marked by numerous accolades and distinctions. He has served as the President of the IEEE Control Systems Society and has received numerous awards for his research and publications.

In addition to his academic and research contributions, Moura has also been an active leader in the engineering community. He has served as the President of the IEEE Control Systems Society and has been a member of the National Academy of Engineering.

The award ceremony was a testament to the impact of Moura's work and the respect he has earned within the engineering community. It was an event that showcased the recognition and appreciation for his contributions to the field.
