Coming Soon! UCPaht November Release

Salary Cost Transfer Redesign, Hire Pilot

The following projects are scheduled to go-live in UCPaht in 2 months, on November 2023.

Salary Cost Transfer Redesign

The Salary Cost Transfer (SCT) Redesign project will build a new Salary Cost Transfer Tool in UCPaht that meets business requirements and reduces current complexity when performing SCT-related entry (Direct Retro) and processing.

What's coming?

The new SCT tool will have many new features for transactors:

- One consolidated entry page that changes fields depending on the type of funding
- Ability to save SCT transactions early and often, with or without validation. Users can resume a saved SCT at any time
- All validation errors are presented at once
- Cost transfers will occur in the same data entry area, instead of the old and new data section in the current state
- A separate MCOP worksheet will no longer be needed for capped funding entries
- Custom SCT in UCPaht that utilizes the Labor Ledger data directly – individual earning entries from paychecks can be selected instead of the entire paycheck
- Clear system indication of which tool is required (Direct Retro or new SCT tool) for specific transaction entries

Who will be impacted?

- All UCPaht transactors will be impacted

What should I do to prepare?

- Add the upcoming Using the New Salary Cost Transfer Tool in UCPaht Topic Based Zoom to your calendars
- Note: The three Salary Cost Transfer Topic Based Zooms that were previously scheduled on November 29, December 6, and December 13 have been consolidated into one session that will now be held prior to go-live

Review the Salary Cost Transfer Redesign Demos for an overview of the changes coming with the project.
Hire Pilot

The Hire Pilot project will streamline the new hire process in the UCPath system, mitigate any data entry errors, and help locations complete the hiring process in a timely manner.

What's coming?

- Transactors will be able to enter new hires and contingent workers **directly into UCPath**
- The overall processing time for new hires will be **significantly reduced** with an automated system
- **Add Person** and **Add Contingent Worker** functionality will be added to HR Tasks tile

*Note: The screenshot above is subject to change.*

Who will be impacted?

- UCPath transactors with the **ability to enter new hire transactions** will be impacted

What should I do to prepare?

- Add the upcoming [Hire Pilot: Adding New Hires and Contingent Workers in UCPath](#) Topic Based Zoom to your calendars

Review the [Hire Pilot project space](#) for an overview of the changes coming with the project.
