## July Specials

---

**Injectable Special**

# **\$50 off any Dysport treatment of \$300 or more\***

**Dysport reduces the appearance of movement lines that primarily affect the area between your eyebrows, around the eyes, and forehead.**

**These lines are natural but with age they can become more prominent. This is because skin loses collagen, the protein fibers responsible for elasticity.**

**Dysport is fast-acting and long-lasting. Improvements can be seen 2-3 days post treatment and last up to 5 months.**

\*Dysport treatment must be completed in July. Special available with April Ross NP, Dr. Hilty, and Dr. Sekharan. Appointments are limited, please call 970-254-2400 to schedule!

## **Esthetician Special**

# Buy 5 Micropeels, Get 1 Free!

## \$550 for 6 Peels

(savings of \$110)

Micropeels are essential for maintaining and restoring your skin's health and appearance. The best results are seen when micropeels are done every 4-6 weeks. Your skincare professional will start with dermaplaning which removes the fine baby hairs on the face. This is followed by the application of a peel tailored to your needs. Your face is left fresh and glowing! Best of all, there is no downtime. This peel is available in a variety of formulations and concentrations to target various skin concerns including fine lines and wrinkles, blemishes, enlarged pores, and uneven skin tone.

Special available with Erin Lambert, Christi Vogt, Amber Schultz, and Afton Jagger.

First treatment must be done in July. Packages may not be shared or transferred between clients.

# Product of the Month

**Buy 2 EltaMD Sunscreens, receive a  
FREE EltaMD Facial Foaming  
Cleanser**

It's officially Summer! ☀️ Did you know the sun's UV rays are actually stronger during the summer months? UV rays from the sun reach us here on earth every day of the year, but during warmer months the angle and position of the earth makes those UV rays even stronger.

The strength of UV rays is also affected by time of day, altitude and reflections (like sun reflecting off sand or water) which is why it's even more important to use daily sun protection! Reach for a Broad-Spectrum SPF and be sure to reapply every two hours.

# Charity of the Month

EUREKA! McConnell Science Museum is a non-profit organization that was founded by John McConnell to help children of all ages understand and enjoy math and science. Their mission is to inspire a passion and respect for STEAM (science, technology, engineering, art, and math) in our communities. This month, 5% of our proceeds will be donated to EUREKA!

Jill Hilty, MD FAAFP

Joyce Sekharan, MD FACS

April Ross, NP

Erin Lambert, LE CLS

Christi Vogt, LE CLS

Afton Jagger, LE

Amber Schultz, LE CLS
