VALLEY FELLOWSSHIP PROGRAM

The recent racially-motivated shootings of Asian women in Atlanta and the vaccine inequities remind me of the limited paths we opened for our community. Our community partners and community members stepped up to fill these gaps in the healthcare system. In doing so, we learned a few things:

1. We need to improve our healthcare system to provide better access to care.
2. We need to work on reducing health disparities.
3. We need to focus on creating a more equitable healthcare system.

We are working towards these goals by building partnerships with community organizations and providing resources to those in need. We believe that the best way to achieve our goals is to work together as a community and to support each other in times of need. We are committed to providing access to high-quality healthcare services for everyone, regardless of their background or circumstances. We believe that everyone deserves the best healthcare, and we are working towards making that a reality.

Thank you for all that you do to support our community. We look forward to continuing to work together to create a healthier and more equitable future.

Best Wishes,
Lisa Goldman Rosas, PhD, MPH
In Community,

Lisa Goldman Rosas, will focus on the California Initiative to Advance Precision Medicine in Monterey County.

Medicine project aimed at reducing cancer disparities through collaborative Precision Medicine in Monterey County.

February as we addressed COVID-19 Vaccine Trials and Adolescent coronavirus vaccine, there are still a number of topics OCE continues to support more than ever. Direct donations make an immediate impact, allowing staff to purchase and continue to provide support with dissemination efforts.

 Deadline for Proposals | Wednesday, April 7, 2021 by 5PM PST

for the Spring and Summer is that we may find time and space for healing.

Spring is upon us along with growing hope that our collective hard work over the last year is starting to pay off...
