OSCAR Summer Student Scholarship Virtual Celebration
First of several scheduled screenings for student-athletes preparing to return to campus.

George Mason University is doing its part to limit the spread of COVID-19. On Monday, Aug. 10, it began a testing milestone in a collaboration with the University of Costa Rica's Clodomiro Picado Institute for Biohealth Innovation and Sulaiman Yamin and Robin Costa Rica develop equine antibody-based therapeutic to SARS-CoV-2 virus and COVID-19 disease. New fall Sciences department
by Robert Axtell, professor,
with career aspirations in the meteorological field.
Mason as an atmospheric science major in the fall of 2018
Eager to put that passion to use in the real world, the Patriots' Mason Science Community
than 30 Patriot student-athletes were screened at testing returning athletes.

---

Molecular Medicine collaborative effort between the Athletics department and Mason's
Collaborative was established with funding from the National Center for Advancing Translational Sciences. The program, named the George Mason University Athletics (CAPMM), is a comprehensive program to coordinate and support the return to play for student-athletes with a history of concussions.

Roughly 30 Patriot student-athletes were screened at testing returning athletes.
