Mason announced last week that it is introducing a rapid-result saliva-based COVID-19 test that will greatly expand attention.
Mason's expanded COVID-19 testing to help make Mason safer during the pandemic. The testing is available to all students, faculty, and staff on campus.

Faculty encouraged to apply for the Spring 2021 Faculty Development Award, which provides support to improve research, scholarship, and teaching.

Applications are open for three new seed awards offered by the College of Science for up to $50,000. The awards are designed to inspire our scientific community while highlighting opportunities across the Mason campus to engage in research. Interdisciplinary projects are highly encouraged. Applications must be submitted no later than COB March 1.

The awards are awarded for up to $50,000. Applications are open for three new seed awards offered by the College of Science for up to $50,000. Applications must be submitted no later than COB March 1.

Understanding the past to build a brighter future
Did you know the commemoration's start had local origins? First celebrated as Negro History Week in 1926, the concept of promoting achievements by Black Americans and other peoples of African descent was created in part by noted Virginia-born and Harvard-trained historian, educator and publisher, Carter G. Woodson. This History Month, a month-long celebration that officially designated since 1976 as an opportunity to highlight significant contributions by the African American community.

President Ronald Reagan once said, "Understanding the history of Black Americans is a key to understanding the strength of our nation."

Fabian G. Hesse, S. Carter Brown, Professor, Laboratory of Molecular Biology, and Director of the Tang Institute, Duke University, delivered a keynote address and highlighted the effort, research. Interdisciplinary projects are highly encouraged. Applications must be submitted no later than COB March 1.
