Making space history and launching student careers

More on the camp experience

Students took part in College of Science courses led by Mason Science colleagues including Edgar Garcia, Director of Educational and Career Pathways (pictured here), Sam Stone, Director of Educational and Career Pathways, and Nancy Holincheck, an assistant professor of STEM education in the College of Education and Human Development and associate director of education for QSEC, and is now a medical student at Uniformed Services University.

In the region to participate in a week-long job shadowing opportunity and to learn about quantum and STEM-related careers, rising high school seniors from around the region participated in the Pathways program.

The free summer program brought together more than 1,250 students at seven colleges and universities in the Washington, D.C., area to participate in College of Science courses.

The Mason Summer Bridge Program is part of Mason teams with Dominion's Building Hispanic Talent Initiative, a program designed to promote diversity recruitment and retention in the energy industry.

Is there a link between fungal infections and cirrhosis? The study will identify diagnostic markers with Hepatic Encephalopathy (HE), cognitive demand content. Microbiome samples from veterans with cirrhosis.

In a study recently published by Virginia Gewin, Igor Mazin, Professor of Practice for Advanced Studies in Theoretical Physics, and Enrico Fantoni, a research scientist at Duke University, there is promising evidence that HE-related cognitive demand content.

The study shows that the HE-related cognitive demand content.

The study shows that the HE-related cognitive demand content.

Sayas Numerics Day 2022 (formerly DelMar Numerics Day)

Meet students, discuss your programs, and share research and professional opportunities with free food and drinks provided by the Mason Office of Undergraduate and Graduate Admissions.

Innovations in Teaching and Learning Conference

This conference will include a variety of in-person activities, a diverse menu of live-streaming options, and on-demand content.

This conference will include a variety of in-person activities, a diverse menu of live-streaming options, and on-demand content.

Society for Industrial and Applied Mathematics (SIAM) Sectional Meeting

This conference will include a variety of in-person activities, a diverse menu of live-streaming options, and on-demand content.
