There is a global and urgent need to accelerate human spaceflight and exploration. Undergraduate students have a unique opportunity to contribute to this mission by participating in space research projects, internships, and industry partnerships. By working as a team, students develop valuable skills in both technical and interpersonal areas, preparing them for careers in the rapidly evolving space industry.

Roundtable Dialogue: Energy policy and decarbonization
March 11, 2021 | 7 to 9 p.m.

Galileo Science Cafe: Creating the Next Generation of Practicing Physicians and Medical Researchers - Practitioners in the Field.
Wednesday, March 10, 2021

Mason Science students partner with local organizations to develop opportunities for medical students, as appropriate, among the designated partners to benefit current and future practitioners in the field.

$2,000,000 from the U.S. Department of Justice for a project aimed at: (1) providing medico-legal learning opportunities for medical students to train as deputy medical examiners/coroners in underserved rural areas; and (2) developing opportunities, as appropriate, among the designated partners to benefit current and future practitioners in the field.

This behavior is unacceptable. I was outraged to hear of this activity and commit to creating a culture where it is not tolerated here at Mason. Not just because Navarro is from my native Venezuela, but also because of her gender. I rejected and condemned this inappropriate and uncalled for behavior. She is a Latina councilmember and the head of the Montgomery County Human Rights Commission. Her decisions are always fair, thoughtful, and, in my opinion, unbiased. I was outraged to hear of this activity and commit to creating a culture where it is not tolerated here at Mason. Not just because Navarro is from my native Venezuela, but also because of her gender. This behavior is unacceptable. I was outraged to hear of this activity and commit to creating a culture where it is not tolerated here at Mason. Not just because Navarro is from my native Venezuela, but also because of her gender. This behavior is unacceptable. I was outraged to hear of this activity and commit to creating a culture where it is not tolerated here at Mason. Not just because Navarro is from my native Venezuela, but also because of her gender. This behavior is unacceptable. I was outraged to hear of this activity and commit to creating a culture where it is not tolerated here at Mason. Not just because Navarro is from my native Venezuela, but also because of her gender.

What behavior are we looking to remove from our culture? Here is an example of a microaggression:

Reductive statements are incidents in which the target person or group is presented in a way that is derogatory, or negative racial slights and insults to the target person or group. Here’s a recent example of reductive statements.

According to a recent article in the Chronicle of Higher Education, “Microaggressions are incidents in which the target person or group is presented in a way that is derogatory, or negative racial slights and insults to the target person or group.” Here’s a recent example of reductive statements.

To be able to grow, we need to better understand the challenges and define the culture we seek, using the best ways to keep court goers safe during the fall. Mason’s plans to expand campus activities in the fall.

Rainald Löhner, Associate Professor of Geospatial Sciences, Department of Mathematical Sciences, talks about how the use of space resources could propel human colonization throughout the solar system in the coming decades and beyond.

Fernando Miralles-Wilhelm, Professor of Physics and Astronomy, discusses how the use of space resources could propel human colonization throughout the solar system in the coming decades and beyond.

Maria Emelianenko, School of Systems Biology Professor, received $2,000,000 from the U.S. Department of Justice for a project aimed at: (1) providing medico-legal learning opportunities for medical students to train as deputy medical examiners/coroners in underserved rural areas; and (2) developing opportunities, as appropriate, among the designated partners to benefit current and future practitioners in the field.
