I began serving as CINA Director one year ago, and the other day was asked what I had learned in that first year. It turns out that fighting Transnational Criminal Organizations (TCOs) is hard. This won’t be a surprise to most of you reading this, but spending time closer to the problem showed me how dynamic, agile, innovative, and ruthless TCOs are, not to mention the fact that they don’t follow the rules.

I also learned that from clarity of mission comes a strategy and actions, and this gets and keeps them all eager and willing to share their experience, knowledge, ideas, and problems. I look forward to our continued mutual success going forward.

I am grateful to all of you who supported and executed the many tasks necessary to get to this point. I am proud of the fact that CINA is able to support such a meaningful mission, and I am thankful to the CINA team for your participation.

I also learned that fighting TCOs, and supporting those that do, is even harder in a pandemic. The first year of the pandemic showed me that this was true, and we had to adapt and pivot to ensure the public learns about this great work. This award really belongs to them. Verrico technology solutions to the nation’s greatest challenges. I work with a great team of colleagues at DHS S&T who do amazing work in research and development of technology solutions to the nation’s greatest challenges. I have been honored to work with a great team of colleagues in the federal government.

The CINA team would like to congratulate John Verrico, Chief of Research & Development at DHS S&T for receiving American Security Today Award for Extraordinary Leadership in Homeland Security and Public Safety. According to Verrico, “DHS S&T does amazing work in research and development of technology solutions to the nation’s greatest challenges. I work with a great team of colleagues at DHS S&T who do amazing work in research and development of technology solutions to the nation’s greatest challenges. I have been honored to work with a great team of colleagues in the federal government.

Stephen Burmeister, a retired supervisory special agent for the FBI, discusses Nashville bombing investigation.

George Mason Institute Professor and former FBI official, Steven Burmeister, classroom博主遵循11月29日发布的“自知之明：打击非法贸易”的主题，鼓励大家参与#WearBlueDay运动，#WearBlueDay运动旨在提高人们对人贩子的意识。

CINA’s new workforce development leader Deanna Austin has been examining development, certification tracking, and experiential learning projects coming out of our Homeland Security Enterprise. She had been examining development, certification tracking, and experiential learning projects coming out of our Homeland Security Enterprise.

CINA’s 2021 Annual RFP invites proposals that will address main problem space. Working with the CINA team and spending time with the folks at DHS, other federal agencies, and the academic community, I have learned that from clarity of mission comes a strategy and actions, and this gets and keeps them all eager and willing to share their experience, knowledge, ideas, and problems. I look forward to our continued mutual success going forward.
