The lag in the move towards renewable energy

Curious about the buzz around quantum, but don't really understand what the big deal is? Want to know more?

Recent PhD graduate's research focused on antibiotics targeting drug resistant pathogens, such as Malaria and Tuberculosis. His colleague Professor Jim Kinter, professor of climate dynamics, chair of the Department of Atmospheric, Oceanic, and Earth Sciences (AOES) will work alongside Professor Chul-Su Shin, professor of geography, and Researcher Bohua Huang, professor of geography, to understand the ways in which climate change impacts human health.

The global pandemic has changed the paradigm, but the dangers of climate change remain constant. That's the message our researchers hope to convey to state decision makers with the upcoming "Virginia's Climate Future" panel to be held from September 21 - 25 | 10 a.m. to 3 p.m.

Championing Women in STEM at Mason

Chul-Su Shin, professor of geography, emphasized in a recent NPR article the important role of Mason's diversity in creating inclusive pathways to success in STEM.

Jennifer Sklarew, professor of space science and geography, and Laura Powers, assistant professor, also shared that the chair of our biology department is a woman and that six of our twelve graduate students are women -- both stats that many universities only dream of achieving. And I also described some of our influential and impactful female faculty who may not lead their program of ours that encourages entrepreneurship and creativity.

Laureate Dr. Bill Phillips, distinguished University of Maryland Distinguished University Professor, and Jennifer Sklarew, professor of space science and geography, will speak on the influence of Alexander von Humboldt and the United States: Art, Nature, and Culture.

The Tag loves the most incredible renewable energy at Mason.
