Be well

We know that COVID-19 can be deadly (my sincere condolences to you who have had to face tragic loss). So what can we do to stay healthy? Here are some suggestions.

According to the World Health Organization (WHO), health is defined as being "a state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity." To understand the significance of wellness, it's important to understand how it's linked to health. According to the WHO, wellness is defined as: "the act of practicing healthy habits on a daily basis to attain better physical and mental health outcomes, so that instead of just surviving, you're thriving. To thrive, you need to put your best foot forward until the end of your days."
