Announcements

New Frankwen Quick Payroll IQ Module Launching December 14

A cost-benefit upgrade occurs when a new version of a new system is released on a required date after the system has been reviewed for its Frankwen (PCP). The new Frankwen Quick Payroll IQ module establishes a global, flexible rate table for all routed expenses. This replaces the Single Project and One to One tools found in the original Quick Payroll module. The new module allows for the posting of an employee’s pay to a single location.

The following resources are available for you to learn more about the new module:
- Quick Payroll IQ Module Quick Start Guide
- Quick Payroll IQ Module training
- Quick Payroll IQ Module help desk

Check-Off for the New “Phew” Stamping Tool

For the rest of December and January, the “Phew” Stamping Tool will be available to all UC employees during the Amazon Web Services (AWS) cutover. During the outage, this feature is also available to departmental UCPath users.

UCPath System Outage

Training & Engagement Resources

University Cost Transfer Training

Re-registration for upcoming University Cost Transfer training is a great way to prepare for the upcoming release of Oracle Cost Transfer and Budgeting in January 2022. This new tool will offer increased BI capabilities for reporting through a dashboard view when it is fully implemented.
