solving this problem connect back to your personal purpose?

To learn more about the ENTP program,

in a twenty-two-year study of nearly three million startups, the researchers found that failure and innovation are positively correlated.

We teach students how to engage a failure resilient mindset to bounce forward when they take more shots at the goal.

Their ultimate "stroke of genius" doesn't come about because they succeed more than Darwin or Elon Musk, fail A LOT - they just don't let failure stop or sideline them.

One way we do this is by identifying and reframing dysfunctional beliefs that hold us that enable our students to thrive, cultivate what is best within them, and build resilience Psychology Center at the University of Pennsylvania, our faculty focus on the strengths
