The Institute for a Sustainable Earth (ISE) is gathering leading voices in the world of water, from environmentalists and policymakers to others across the Mason community—and with other communities, policy-makers, and international organizations. The 64th Annual Meeting of the Comparative and International Education Society (CIES) will create opportunities for sharing cutting-edge research and practice, immerse in a welcoming environment, and generate new collaborations. 

The Environmental Engineering Program supports potentially transformative fundamental research and education in the areas of water treatment, environmental biotechnology, and environmental planning. The Division of Environmental Biology (DEB) supports research in aquatic and terrestrial ecosystems, including the study of evolutionary and ecological processes acting at the level of populations, species, communities, and ecosystems. The Division of Environmental Biology (DEB) supports research in aquatic and terrestrial ecosystems, including the study of evolutionary and ecological processes acting at the level of populations, species, communities, and ecosystems.

The Virginia Department of Environmental Quality (DEQ) is sponsoring two ISE faculty with travel awards ($2,500 each).
