The Institute for a Sustainable Earth (ISE) aims to connect members of the Mason community and achieve the following objectives:

1. To facilitate information sharing among researchers, practitioners, and relevant local, national, and international networks.
2. To enhance interdisciplinary collaboration, professional community, and engage in meaningful intellectual exchange.
3. To support the development of a sustainability-related curriculum and student support system.
4. To improve student learning and engagement in sustainability and professional growth.
5. To increase Mason’s academic, research, and economic impact on sustainability.
6. To develop Mason’s profile as a leader in sustainability and enhance Mason’s reputation locally, nationally, and internationally.

The 64th Annual Meeting of the Comparative and International Education Society aims to highlight the latest research and developments in education, and to foster collaborations and partnerships among scholars and practitioners.

The Division of Environmental Biology (DEB) of the National Science Foundation invites qualified investigators to apply for grants to address sustainability-related issues, such as climate change, biodiversity conservation, and ecosystem services. The projects should be interdisciplinary in nature and have the potential to make significant contributions to the field.

For more information and to apply, please visit the DEB website or contact the program director at debi2020@gmu.edu.

The MITRE Corporation and US Department of Homeland Security invite qualified investigators to apply for grants to address cybersecurity and related issues. The projects should be interdisciplinary in nature and have the potential to make significant contributions to the field.

For more information and to apply, please visit the MITRE website or contact the program director at mitresanjose@gmail.com.

The Office of Sustainability (OoS) is hosting the 4th Annual Mason Energy Forum on April 8, 2020, to discuss sustainability-related issues and to foster collaborations among stakeholders. The forum will feature keynote speakers and panel discussions on topics such as energy security, renewable energy, and sustainability education.

For more information and to register, please visit the OoS website or contact the program director at officeof sustainability@gmu.edu.

The call for presentations is currently open at adade3@gmu.edu. The conference theme challenges us to rethink the role of education in the era of sustainability.

For more information and to submit a presentation, please visit the conference website or contact the program director at conference@gmu.edu.
