The biweekly newsletter aims to address pressing sustainability and resilience challenges. Businesses and organizations can work together with others across the Mason community—and with other communities, policy-makers, and ecosystem stakeholders—so that, together, we can more effectively address the world's sustainability challenges.

Water Summit
The theme is "Innovative Trends on Campuses in Clean Energy and Sustainability". This will be a gathering of experts, students, and faculty from the fields of micro/biology, environmental chemistry, and environmental geophysics may be relevant to the environmental challenges we face today. The event will feature presentations, workshops, and networking opportunities for attendees to learn about the latest research and developments in these fields.

International Education Society
64th Annual Meeting of the Comparative and International Education Society
The conference will bring together scholars, practitioners, and policy-makers from around the world to discuss the latest trends and issues in international education, including the role of higher education in fostering global citizenship and sustainable development.

American Prosperity — Politics and Prosperity in Majority
Gladwell prior to the event.

MetroLab Network
Arlington Campus.
