General

Procurement Cost Transfer

This month we're highlighting a new tool that can help simplify your life as a procurement department. The Central Oracle BI & Financial Reporting team has released a new Project COA Lookup Tool!!! It is designed to make it easier to find the valid chart string combinations for your financial unit. This tool will be especially valuable for those responsible for approving requisitions and invoices on behalf of their financial unit. The tool can also be used to verify that the valid chart string combinations for your financial unit are being used in the purchasing process. The tool can be used to search for chart string combinations by FinUnit, Project, Task, or Person Name (assigned as the financial unit owner). The tool also includes a report that lists all chart string combinations for a given FinUnit, Project, or Task. This report can be used to validate that the valid chart string combinations for a given financial unit are being used in the purchasing process. The tool can also be used to search for chart string combinations by FinUnit, Project, Task, or Person Name (assigned as the financial unit owner). The tool also includes a report that lists all chart string combinations for a given FinUnit, Project, or Task. This report can be used to validate that the valid chart string combinations for a given financial unit are being used in the purchasing process.

Announcements

Oracle Financial Cloud
