ANP Provides Comfortable Illumination in the Largest Wood Structure Building in the USA.

Designed by Michael Green Architecture in conjunction with the DLR Group, the T3 (timber, transit, and technology) development is a seven-story mass timber office building located in the North Loop neighborhood of downtown Minneapolis.

Our Oversized Shade OSAB42, 42 inches in diameter, was selected for the soft seating social workspace areas to fill the overhead space. A domed, wider distribution lens on the dimmable LED module, provides even, energy efficient illumination.

Our Retropolitan shade WFU514 with decorative wire cages illuminates the T3 meeting spaces. The dimmable LED module with a flat lens reduces potential glare in the space.
