Perfect in every way

En route to their second national championship in three years, the Clemson Tigers became the first team in the modern era to go 15-0, anointing the 2018-2019 squad as the "greatest college football team of all time." The Tigers crushed the vaunted Alabama Crimson Tide 44-16 on Jan. 7 in Santa Clara, California. True-freshman quarterback Trevor Lawrence led the charge, playing with a calm and maturity well beyond his years. The following Saturday, tens of thousands attended a championship parade and celebration in downtown Clemson and at the stadium. The Tigers, arm-in-arm, as they took the field and know that all of us (faculty, staff, students, family, and friends) are ready to lock arms with you and support each other.

As you set your 2019 goals, I offer you this for your consideration: "I will be the absolute best I can be – every day – in the classroom, in the field, in the lab, in my life." As your professors, advisors, family, and peers push you to generate new ideas, to focus and work harder, and to be resilient in your pursuit of excellence, please remember that image of Coach Swinney and the Clemson Tigers of 2018-2019.

Go Tigers!

Have the best Spring Semester!

As we relentlessly pursue excellence in science, we may not have national championships, but the discovery that Mojave Rattlesnakes have multiple venom types that are more widespread than previously believed required a large research collaboration between principal investigators, researchers, and citizen scientists. Clemson researchers work with citizen-scientists to better understand diversity of rattlesnake venom and prepare you – the next generation of scientists.

As we work with citizen-scientists, we are exploring new areas for the future of our research, faculty, and students. Want to contribute? Contact your advisor or the College of Science or Clemson REU office for more information.

Scholarship and fellowship recipients

Some of our best achievements in important areas of science are inextricably linked to financial support, and we are proud of the many generous donors who support these students. Find out more about SCIENCE: Visit clemson.edu/science.
