Perfect in every way

For the first time in modern history, in three years, the Clemson Tigers have been named national champions. After over 120 years of making a name for themselves, the Clemson Tigers have now reached the pinnacle of success. From the moment the final whistle was吹, the Tigers' fans across the globe were celebrating. As the team's victory parade wound through the streets of downtown Clemson, the atmosphere was electric. People of all ages came together, uniting in their shared joy and pride. The Tiger's success was not just a victory for the players and coaches, but for everyone who has supported and believed in the team throughout the year.

The journey to the championship was anything but easy. The team faced challenges at every turn, but they remained resilient and dedicated. Their work ethic and determination were evident in every game, and they proved that they were one of the greatest college football teams of all time. The Tigers crushed the vaunted Alabama Crimson Tide 44-16 on Jan. 7 in Santa Clara, California. True-freshman quarterback Trevor Lawrence led the charge, playing a near-spectacular game. His ultra-talented team of coaches and players. Up next: three out of four?

College of Science joins the Clemson University family in congratulating coach Dabo Swinney and his ultra-talented team of coaches and players. Up next: three out of four?

En route to their second national championship in three years, the Clemson Tigers became the first team in the modern era to go 15-0, anointing the 2018-2019 squad as the “greatest college football team of all time.” The Tigers crushed the vaunted Alabama Crimson Tide 44-16 on Jan. 7 in Santa Clara, California. The Clemson “Perfect Season” Trophy is now the envy of many,

Workshop to focus on the rising field of Data Science

The College of Science is piloting a new seminar series in spring 2019 intended to equip SCIENCE undergraduate and graduate students with the professional development skills they will need to find the enrichment opportunities they want across the University. Dubbed Science Engagement and Professionalism, the seminar series will run on Mondays from 5:30-6:30 p.m. in the Watt Center, room 106. Lectures are designed for students, faculty, staff and their friends (or family). The seminar series will focus on the tools of data science and will be led by a faculty member from the Department of Statistics and Data Science.

Retrieve Research, Engage and Professionalism – the seminar series will run on Mondays from 5:30-6:30 p.m. in the Watt Center, room 106. The seminar series will focus on the tools of data science and will be led by a faculty member from the Department of Statistics and Data Science.

Clemson researchers work with citizen-scientists to better understand diversity of rattlesnake venom

The Mojave rattlesnakes that live in the deserts of southwestern United States and central Mexico are packed with lethal venom, though they rarely strike unless provoked. Image courtesy of Travis Fisher

Scientists in the lab of Clemson University professor Andrew MacFarlane, a biologist and evolutionary ecologist, and his team are using citizen-scientists to yield perfection for Clemson Football this year. After weeks of preparation, the team is set to take on the University of South Carolina this Saturday. As the game approaches, the Tigers are ready to lock arms with you and support each other. Tigers, arm-in-arm, as they take the field and know that all of us (faculty, staff, students, family, and friends) are ready to turn to our goals this year. As you set your 2019 goals, I offer you this for your consideration: “I will be the absolute best I can be – every day – in the classroom, in the field, in the lab, in my life.” As your professors, advisors, family, and peers push you to generate new ideas, to focus and work harder, and to be resilient in your pursuit of excellence, please remember that image of Coach Swinney and the Tigers' success.
