Perfect in every way

In route to their second national championship in three years, the Clemson Tigers became the first team in the modern era to go 15-0, anointing the 2018-2019 squad as the “greatest college football team of all time.” The Tigers crushed the vaunted Alabama Crimson Tide 44-16 on Jan. 7 in Santa Clara, California. True-freshman quarterback Trevor Lawrence led the charge, playing with a calm and maturity well beyond his years. The following Saturday, tens of thousands attended a championship parade and celebration in downtown Clemson and at the stadium. The College of Science joins the Clemson University family in congratulating coach Dabo Swinney and his ultra-talented team of coaches and players. Up next: three out of four?

Workshop to focus on the rising field of Data Science

The College of Science and the College of Engineering, Computing and Applied Sciences are hosting a workshop on Data Science, Analytics, and Decision Making on January 12. Ten faculty will present their research at the four-hour workshop at Watt Auditorium.

New lecture series promotes professional development to SCIENCE students

The College of Science is piloting a new seminar series in spring 2019 intended to equip SCIENCE undergraduate and graduate students with the professional development skills they will need to succeed in the workforce. Dubbed Science Engagement and Professionalism, the series is designed for students, faculty, and staff and features weekly lectures and student-faculty conversations.

Scholarship and fellowship recipients

As you do, you benefit from a community of like-minded mentees who are also working to prepare you – the next generation of scientists. As we relentlessly pursue excellence in science, we may not have national championships, but our pursuit of excellence in science will yield perfection for Clemson Football this year.

Hope your 2019 is off to a fantastic start!

Clemson researchers work with citizen-scientists to better understand diversity of rattlesnake venom

The Mojave rattlesnakes that live in the deserts of southwestern United States and central Mexico are packed with lethal venom, though they rarely strike unless provoked. Image courtesy of Travis Fisher

The discovery that Mojave Rattlesnakes have multiple venom types that are more widespread and impact the world around us. Topics will include statistics, algorithms, analytics, optimization and machine learning. Faculty, staff and students are strongly encouraged to attend.

Have the best Spring Semester!

As you set your 2019 goals, I offer you this for your consideration: “I will be the absolute best I can be – every day – in the classroom, in the field, in the lab, in my life.” As your professors, advisors, family, and peers push you to generate new ideas, to focus and work harder, and to be resilient in your pursuit of excellence, please remember that image of Coach Swinney and the resilience we saw in his ultra-talented team of coaches and players. Up next: three out of four?
