our culture of philanthropy at Clemson, and your help in thanking our donors is critical. If you are one of these recipients for the 2018-19 academic year, you should have received an email requesting that you complete a Student Profile and a handwritten Thank You Note. Please check your email and complete the Student Profile on or before Jan. 31. It is important that we build on the support of our donors.

Some of you benefit from a scholarship or fellowship established by a gift to the University. If you are a recipient of a scholarship or fellowship, your email and complete the Student Profile on or before Jan. 31. It is important that we build on the support of our donors.

Perfect in every way
On route to their second national championship in three years, the Clemson Tigers’ football team of all time.” The Tigers crushed the vaunted Alabama Crimson Tide 44-16 on Jan. 7 in Santa Clara, California. True-freshman quarterback Trevor Lawrence led the charge, playing alongside teammates and coach Dabo Swinney (far right). Image credit: Clemson University. The following Saturday, tens of thousands attended a championship parade and celebration in downtown Clemson and at the stadium. The Tigers, arm-in-arm, as they took the field and know that all of us (faculty, staff, students, family, and friends) are ready to lock arms with you and support each other.

Tigers, arm-in-arm, as they took the field and know that all of us (faculty, staff, students, family, and friends) are ready to lock arms with you and support each other.

As you set your 2019 goals, I offer you this for your consideration: “I will be the absolute best I can be – every day – in the classroom, in the field, in the lab, in my life.” As your professors, advisors, family, and peers push you to generate new ideas, to focus and work harder, and to be resilient in your pursuit of excellence, please remember that image of Coach Swinney and the culture of excellence that he has championed.

As we relentlessly pursue excellence in science, we may not have national championships, but we will have a tremendous positive impact as we tackle tomorrow’s greatest scientific challenges.

Clemson researchers work with citizen-scientists to better understand diversity of rattlesnake venom

The Mojave rattlesnakes that live in the deserts of southwestern United States and central Mexico are packed with lethal venom, though they rarely strike unless provoked. Image courtesy of Travis Fisher, Mojave Desert Life Science Foundation. The research was published in Scientific Reports.

The discovery that Mojave Rattlesnakes have multiple venom types that are more widespread than previously believed required a large research collaboration between principal investigators, students and almost 100 citizen-scientists in five laboratories across the United States and Mexico. The research was published in Scientific Reports.

New lecture series promotes professional development to SCIENCE students

The College of Science is piloting a new seminar series to bring SCIENCE undergraduate and graduate students with the professional development skills they will need to find the enrichment opportunities they want across the University. Dubbed Science professionalism,” the seminar series will run on Mondays from 5:30-6:30 p.m. in the Watt Center, room 106. Lectures are designed for students, researchers, professionals, and will be led by professional development experts from across the University.
